

## HOW TO MOUNT THE NEW BLACKOUT HEADLIGHT MASK

Remove the lens retaining ring screw, using care so that the lens does not drop off and break. Remove lens ring.

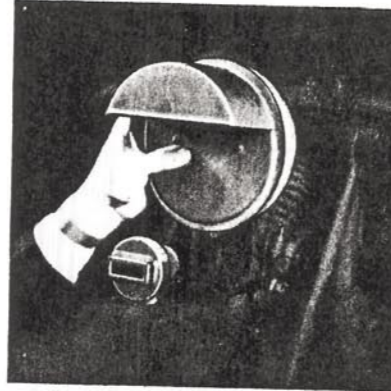

Remove the lens as above.

The original lens rubber gasket is very narrow. Remove this gasket as shown.

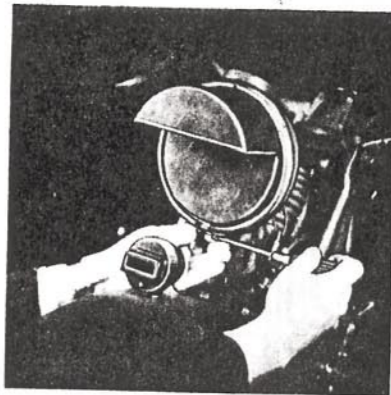

Cement and press the new "thick" gasket into place so that it seats firmly into its groove.

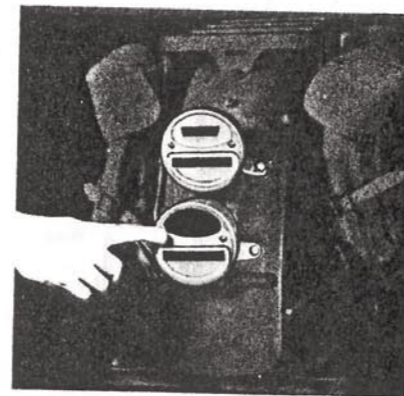

Hold blackout mask in position as shown, with hooded section at top. It should be level.

Fit same lens retaining ring around edge of mask and headlamp.

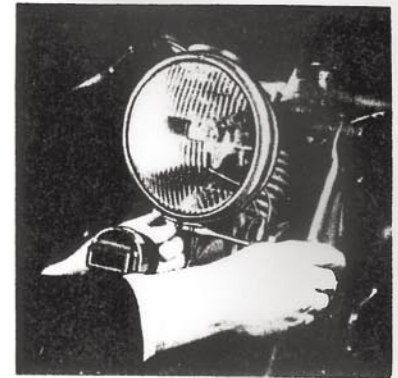

Use long screw and tighten lens ring into place.

Remove lower service tail light. Wiring should be disconnected as given under wire changeover instructions.
